Metrics Framework

Completed Consultations per MAU

01

**Activation → First
Booking Rate**

02

**Revenue → GBV & Take
Rate**

03

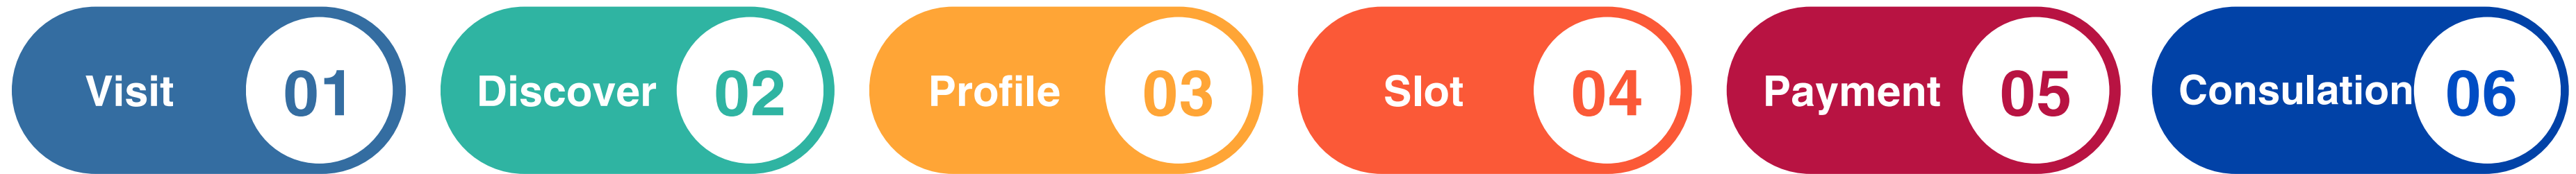

**Retention → Repeat
Booking Rate**

04

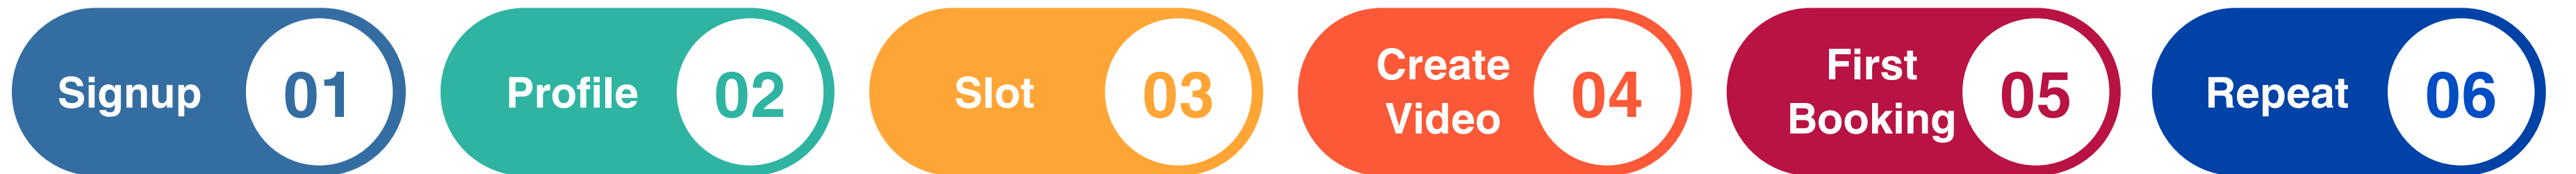

**Supply Health → Time to
First Booking (Expert)**

Funnel Overview

User Funnel

Expert Funnel

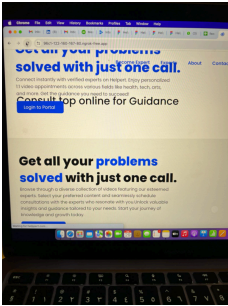

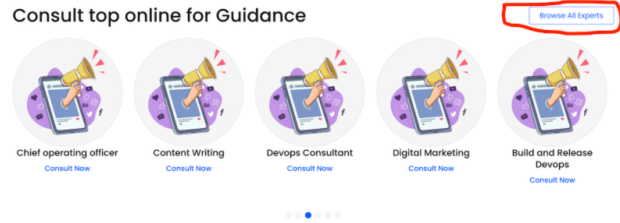

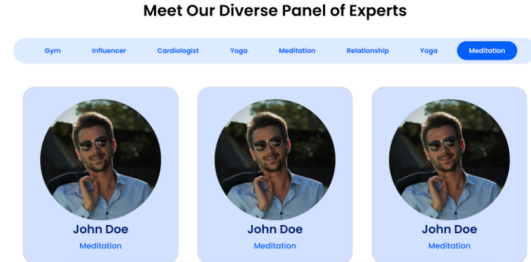

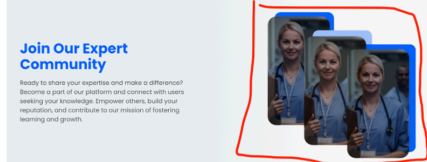

Callout

Highest drop-offs observed near payment and first booking stages

Product Issues Identified During Development

Structured issue tracker maintained during development to document usability, functional, and onboarding issues.

Issue	Page Name	Issue Description:	Image	Issue Status	Priority	Deadline	Helpert Tm Feedback
1	Home	reloader issues, When page refreshed text and looks scrambled		✓ Complet... ▾	● High ▾	03 Jan 20...	
2	All Pages	Image loading (Implement lazy loading)		✓ Complet... ▾	● Med... ▾	03 Jan 20...	
3	Browse	When user clicks "Browse All Experts" it should open all the experts page, This should show this page, Use this page & modify it https://helperts.com/category		✓ Complet... ▾	● Med... ▾	03 Jan 20...	
4	Expert	Expert page has to completed, please integret APIs, all the categorie. It should show the profiles based on selected category		✓ Complet... ▾	● High ▾	03 Jan 20...	experts profile page is not opening
5	Become Expert	Can you please update this image or use some stock images, improve this design		✎ In progr... ▾	● Low ▾	03 Jan 20...	

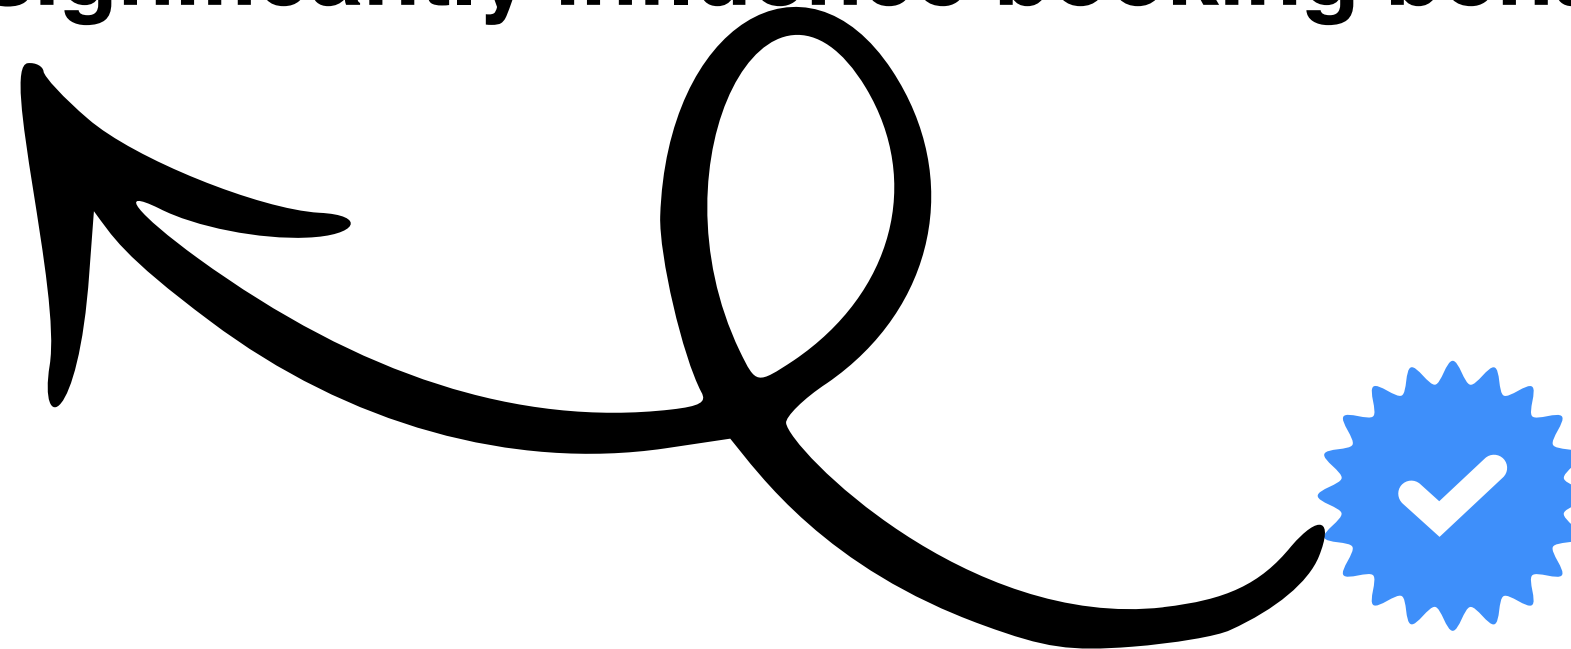

From Product Issues to Business Impact

Product issue	User Impact	Business Impact
Forced payment setup	~40% drop-off at payment setup stage	Reduced expert supply
No skip/remind option	Hesitate User Exit	Lost first-time conversions
No skip/remind option	Confusion	Lower activation rate
Broken expectations	Trust Drop	Reduced retention & repeat usage

 Most high-impact issues were concentrated at high-intent stages of the funnel, amplifying their effect on conversion and revenue.

Key Insights

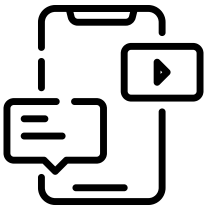

- 01** High-intent friction causes disproportionate drop-offs
- 02** Expert onboarding directly affects marketplace supply
- 03** Trust signals significantly influence booking behavior

My Role & Ownership

- Owned internal product issue tracking during development
- Categorized issues by severity and business impact
- Collaborated with developers to clarify fixes
- Shared insights with founders to guide prioritization
- Connected product issues to funnel and revenue impact

Experimentation Roadmap

■ Reel-first expert profiles

Metric: Profile →
Booking conversion

■ Availability nudges

Metric: Booking
initiation rate

Trust badges

Metric: Payment
completion rate

Skip & Remind Payment
Flow

Metric: Expert
onboarding completion
rate

Strategic Priorities

Reduce early friction so users and experts reach their first successful booking faster.

Improve activation

Accelerate time-to-first-booking to keep experts engaged and retained.

Reduce expert churn

Drive re-engagement through post-consultation nudges and personalized recommendations.

Increase repeat bookings

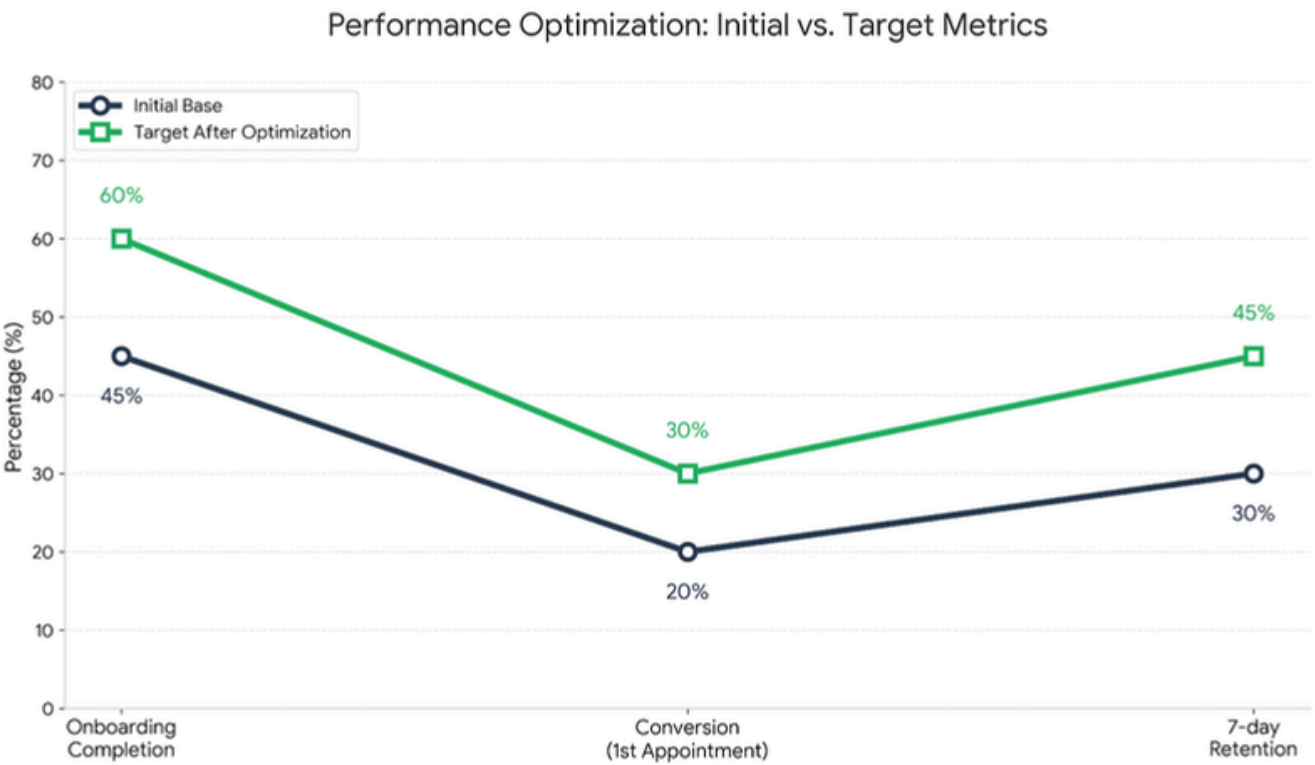

- Increase successful transactions by optimizing pricing and payment flows without adding friction.

Scale monetization

Success Criteria

Area	Initial Base	Target After Optimization
Onboarding Completion	~45%	60%+
Conversion (1st Appointment)	~20%	30%+
7-day Retention	~30%	~45%

*Targets based on funnel analysis, issue tracking data, and comparable marketplace benchmarks.

Appendix

Product Issue Tracker

- 30+ issues logged during development
- Available upon request
